

## M E T A P L A N

Metaplan is a modular system of executive wood casegoods developed in response to the market's expressed need for high quality wood office furniture that is not only functional, affordable, and beautiful to look at, but more importantly, easily reconfigured whenever and wherever necessary. Metaplan addresses a wide range of function and

budget considerations with three separate and distinctive series: From, Basic, to meet budgetary constraints, to Solutions and Classic that are complete furniture systems with unlimited reconfigurability. As the photos on the left demonstrate, the patented Metaplan system, with

rigid metal to metal connectors, easily converts from a left handed to a right handed configuration, and back again using nothing more than an ordinary screwdriver.

Holding fast to the integrity of design and uncompromising attention to detail that is exemplified in our hand lay-up of fine veneers and nineteen step hand rubbed finish,

Novikoff offers the kind of “old world” craftsmanship that is seldom found on mass produced systems furniture. And our unwavering commitment to quality and customer service makes us confident that Metaplan will meet your most demanding office furniture requirements now . . . and for many years to come.

**Solutions Desk & Credenza:** 615 Champagne Cherry / 1900 Transitional Edge / Chrome
